32. DOCKET NO. 2-9-10-14A

Amended petition by LAND AND NATURAL RESOURCE DEVELOPMENT, INC., an Alabama corporation, requesting the State Oil and Gas Board to enter an order establishing a new gas field in Pickens County, Alabama, to be named the Elmore Creek Field, or such other name as the Board deems proper, and to adopt Special Field Rules therefor. The proposed field, as underlain by the Lewis Sand Gas Pool shall consist of the West Half of Section 5, Township 19 South, Range 13 West, Pickens County, Alabama.

The Lewis Sand Gas Pool should be defined as that interval of the Lewis Sand productive of hydrocarbons between 5,216 feet and 5,232 feet, as indicated on the Dual Induction Log of the Irvin 5-6 #1 Well, Permit No. 11596-A, located in the West Half of Section 5, Township 19 South, Range 13 West, Pickens County, Alabama. Petitioner is requesting well spacing of a governmental half section containing approximately 320 surface acres, and is also requesting the establishment of allowables for said field.

Petitioner is also requesting that the 320-acre unit consisting of the West Half of Section 5, Township 19 South, Range 13 West, Pickens County, Alabama, be approved as the permanent production unit for the Irvin 5-6 #1 Well.

BOARD ACTION: Granted 2-11-10.
ORDER NO. 2010-19

33. DOCKET NO. 2-9-10-15

Petition by JABSCO OIL OPERATING, LLC, an Alabama limited liability company, requesting the State Oil and Gas Board to enter an order establishing a new shale gas field to be known as the Gentry Creek Field, or by such other name as the Board deems appropriate, and to adopt Special Field Rules therefor. The proposed field, as underlain by the Floyd Shale Gas Pool, consists of the East Half of Section 29, Township 17 South, Range 15 West, Lamar County, Alabama.

Petitioner drilled and completed the Burns 29-9 #1 Well, Permit No. 14303-BH, as the discovery well in the proposed Floyd Shale Gas Pool. Said well was drilled as a horizontal well and, as such, did not penetrate the entire interval of the Floyd Shale. Therefore, the Floyd Shale Gas Pool should be defined as that interval of the Floyd Shale productive of hydrocarbons between 4,700 feet and 4,865 feet as indicated on the Dual Induction Focused logs of the nearby plugged and abandoned Herron 29-1 #1 Well, Permit No. 3468, including those strata productive of hydrocarbons which can be correlated therewith, and all zones in communication therewith, and productive extensions thereof. Said pool constitutes a separate and distinct shale gas producing pool in said field, separate and distinct from any other producing pool in said field.

The presently known characteristics of the Floyd Shale Gas Pool in said proposed field, as above defined, and the technical, economic, and environmental considerations are such that Petitioner is requesting the establishment of Special Field Rules providing for production units consisting of 320-acre governmental half sections and avers that said Special Field Rules are in the best interest of prudent development and oil and gas conservation, will permit orderly development of the Floyd Shale Gas Pool, avoid the drilling of unnecessary wells, protect correlative rights, and prevent waste.

Petitioner is also requesting that production allowables be established, and that the 320-acre drilling unit for the Burns 29-9 #1 Well consisting of the East Half of Section 29, Township 17 South, Range 15 West, Lamar County, Alabama, be established as the permanent production unit for said well.

BOARD ACTION: Continued 2-11-10.
